

Australia comprises a land area of about 7,692,030 square kilometres (see table below). The land lies between latitudes 10°41' South (Cape York) and 43°39' South (South East Cape, Tasmania) and between longitudes 113°09' East (Steep Point, Western Australia) and 153°39' East (Cape Byron, New South Wales).

The area of Australia is almost as great as that of the United States of America (excluding Alaska), about 50% greater than Europe (excluding the former USSR) and 32 times greater than the United Kingdom.

Australia is composed of six States: New South Wales (NSW), Victoria (Vic.), Queensland (Qld), South Australia (SA), Western Australia (WA), Tasmania (Tas.) and two Territories: the Northern Territory (NT) and the Australian Capital Territory (ACT). The longest river in Australia is the Murray River (2,520 kilometres), which forms a natural border between NSW and Vic. The highest mountain in Australia is Kosciuszko, 2,230 metres, which is situated in NSW.

Cover: Old Parliament House, closed as an Australian Parliament in May 1988, is now an exhibition centre and museum of Australian political history. The central flagpole appears as though it is part of this building. In fact, the flag, flying 81 metres high, is part of New Parliament House, unseen in the background. Both buildings, in Australia’s national capital of Canberra, are powerful symbols of our nation which in 2001 celebrates its Centenary of Federation.
